ANNUAL INDEX

PUBLIC WORKS

Volume 85

January-December

1954

THE MOST USEFUL ENGINEERING MAGAZINE
FOR CITIES, COUNTIES AND STATES

● *This Volume of PUBLIC WORKS is available on microfilm through University Microfilms, 313 North First St., Ann Arbor, Michigan.*

Published by Public Works Magazine, 310 E. 45th St., New York 17, N. Y.

PUBLIC WORKS INDEX

Volume 85

January-December 1954

Month and page

HIGHWAYS AND STREETS

Bituminous Pavements

How to Make Old Roads Fit for Today's Traffic — Jan.–67
Low Cost City Pavements in Detroit — Feb.–69
How to Improve Asphalt Quality — Apr.–84
Expanded Facilities Used for Improving a County Road System — July–68
A New Use for Foamed Asphalt — July–93
Intermediate Bituminous Mixes Help Stretch Funds — Aug.–133
Reinforcing Asphaltic Concrete with Roll Fabric — Sept.–134
A Report on the Use of Rubber in Bituminous Pavements — Nov.–73

Bridges, Culverts, Drainage & Tunnels

Air Placed Concrete Restores County Bridges — Jan.–61
Pre-Cast Concrete and Salvaged Steel Bridges Save Money — Mar.–80
New Engineering Ideas Feature New Orleans Vehicular Tunnels — Mar.–112
Repairing and Widening a Heavily Traveled Viaduct — Apr.–83
Design for Catch Basins and Inlets for Storm Sewers — May–106
Less Water — Better Roads — May–141
Gunite Repair for a Concrete Arch Bridge — June–81
Machine for Removing Berm from Shoulders — July–98
Prefabricated Bridges Reduce Replacement Costs — Aug.–96
Cost Data on Bridge Painting by Contract — Sept.–164

Concrete Pavements

How to Make Old Roads Fit for Today's Traffic — Jan.–67
New Technique for Repairing Spalled Joints — Nov.–68
Special Screed Used for Finishing Third Highway Lane — Nov.–111

Construction Methods

Air Placed Concrete Restores County Bridges — Jan.–61
How to Make Old Roads Fit for Today's Traffic — Jan.–67
Making Modern Highways in Pennsylvania — Feb.–61
Smoother Riding for the New Jersey Turnpike — Mar.–72
Mechanical Stabilization–A Potent Factor for Reducing Highway Costs — Mar.–90
Fifty Years of Dirt Moving — Apr.–97
Typical Pavement Modernization — Apr.–99
Modern Macadam Pavement Chosen for Heavy Duty Expressway — June–69
Good Engineering and Inspection is Important in Street Work — June–112
A Test of Methods of Backfilling Trenches — Aug.–126
Procedures in Reconstructing a Texas Highway — Oct.–118

Curbs, Gutters and Sidewalks

Building a Combined Curb and Gutter — May–114
How to Build a Concrete Sidewalk — Aug.–131
Standard Plans and Specifications for Curbs, Gutters and Walks — Dec.–116

Month and page

Design

How to Make Old Roads Fit for Today's Traffic — Jan.–67
Design Details of Oklahoma's Turner Turnpike — Jan.–130
Economics in Highway Relocation — May–108
Experience with High Crown Streets in Large Scale Resurfacing Program — June–73
Good Engineering and Inspection is Important in Street Work — June–112

Digests

Jan.–120; Feb.–104; Mar.–128; Apr.–126; May–162; June–128; July–128; Aug.–128; Sept.–152; Oct.–130; Nov.–120; Dec.–112

Equipment

Street Repair Work Speeded by Paving Machine — Mar.–38
Equipment for Roadside Maintenance — July–74
We Use Winter to Repair Paving Equipment — Aug.–76
Equipment Management–The Milwaukee Way — Sept.–116
Patching Trains Keep Street Maintenance Rolling — Oct.–95

Finance, Legal and Planning

Making Modern Highways in Pennsylvania — Feb.–61
Tax-Free Municipal Parking Program–It Works — Feb.–77
Ohio Procedure for Establishing an Urban Arterial Highway System — Mar.–131
Economics in Highway Relocation — May–108
Land Trade Gave Us a New Public Works Garage — May–117
Highlights of the Ohio Department of Highways Report — June–101
Paving–A Key Element in Subdivision Regulation — Sept.–102
Setting Up the Season's Road Work — Nov.–110
First Soil Cement Streets in Kentucky Under New Financing Law — Dec.–78

Materials

Low Cost City Pavements in Detroit — Feb.–69
Mechanical Stabilization–A Potent Factor for Reducing Highway Costs — Mar.–90
A New Use for Foamed Asphalt — July–93
What the City and County Engineer Should Know About Soil Investigations — Nov.–83

Pavement Modernization

How to Make Old Roads Fit for Today's Traffic — Jan.–67
Making Modern Highways in Pennsylvania — Feb.–61
Repairing and Widening a Heavily Traveled Viaduct — Apr.–83
Experience with High Crown Streets in Large Scale Resurfacing Program — June–73
New Ideas in Street Widening Produce Economical Results — Oct.–73
Park Ridge Cuts Repaving Costs — Nov.–86

Roadside Improvement

How Roadside Clean-up is Handled by Counties — Feb.–117
How Counties Handle Roadside Cleanup — Mar.–133
Highway Slope Stabilization — Apr.–58
Roadside Tree Maintenance in Rhode Island — June–72
Equipment for Roadside Maintenance — July–74
Chemicals Reduce Cost of Highway Roadside Maintenance — Sept.–105

Month and page

Safety

Public Employees Overlooked Quotients in Safety — Mar.–141
Shrubs as an Aid to Highway Safety — Apr.–58
Minnesota Highway Safety — June–88
Lighting and Traffic Control for Present Day Highways — June–91
Heating Provides Built-In Safety for Expressway Ramps — Aug.–92
Solving the "Slippery When Wet" Road Problem — Oct.–97
Bright Green Markings Control Pedestrian Traffic — Nov.–89

Snow and Ice Control

Snow Melting System Serves a 700-Ft. Street — Jan.–102
25 Years of Winter Maintenance in New Hampshire — Aug.–67
Where Snow and Ice Control is a Big Problem — Aug.–72
Snow and Ice Control on the Edge of the Cold Belt — Aug.–83
Heating Provides Built-In Safety for Expressway Ramps — Aug.–92
Making Modern Living Normal in the Snow Belt — Sept.–94
Paul Bunyan's Homeland Prepares for Winter — Oct.–86
Test Corrosion Inhibitors in Snow and Ice Control — Nov.–97
Frozen Sand Thawed by Exhaust Heat — Nov.–126

Stabilized Surfaces and Bases

Mechanical Stabilization–A Potent Factor for Reducing Highway Costs — Mar.–90
Low-Cost Street Paving Program — Apr.–91
Oil Stabilization for Street Maintenance — May–115
First Soil Cement Streets in Kentucky Under New Financing Law — Dec.–78
Soil Stabilization with Bituminous Materials — Dec.–82

Street Cleaning

4 Musts for Better Street Cleaning — Jan.–63
Device Fills Street Sweeper Brooms — Mar.–100
How Counties Handle Roadside Cleanup — Mar.–133
Steam Cleaner Used on Safety Islands — June–68
Highway Vacuum Cleaner Picks up Roadside Trash — July–87
Street Cleaning and Refuse Costs — Sept.–150
Truck Loaders Save Five Times Their Cost in Street Cleaning — Nov.–89

Street Lighting

Wall-Mounted Lights Illuminate Ramp Without Glare — Feb.–111
Fluorescent Luminaire for Intersections Gives Results — Mar.–98
Houston–The New City of Light — Apr.–81
Concrete Saw Speeds Street Light Replacement — May–146
Lighting and Traffic Control for Present Day Highways — June–91
Mercury Vapor Lighting for a Heavily Traveled Thoroughfare — July–76
Fluorescent Mercury Vapor Lights in New Orleans — Aug.–81
Lighting and Traffic Control in Rhode Island — Aug.–16
Aluminum Light Standards Erected in Heavy Traffic Area — Sept.–93

Surface Maintenance

How to Make Old Roads Fit for Today's Traffic — Jan.–67
Making Modern Highways in Pennsylvania — Feb.–61
Tearing up Street Car Tracks Is Easy — Feb.–87
Smoother Riding for the New Jersey Turnpike — Mar.–72

Month and page

Concrete Joint Maintenance in Ohio — Mar.–99
Oil Stabilization for Street Maintenance — May–115
Experience with High Crown Streets in Large Scale Resurfacing Program — June–73
Diluted Emulsion Surface Seals for Highway Surfaces — Sept.–128
Patching Trains Keep Street Maintenance Rolling — Oct.–95
Procedures in Reconstructing a Texas Highway — Oct.–118
Park Ridge Cuts Repaving Costs — Nov.–86
Stretching Your Maintenance Dollars on Low Cost Pavement — Nov.–99

Surveying Methods

Six Uses for a Roughometer Survey — Jan.–55
Highlights of the Ohio Department of Highways Report — June–101
Photogrammetry in City Planning — June–114
Air Mapping Completed for Kent County, Mich. — Aug.–98
How Alabama Uses Aerial Photographs for Highway Location — Sept.–173

Traffic Control

12 Basic Steps to Break the Stranglehold of Traffic — Jan.–94
Speed Laws Re-examined in Virginia — Feb.–83
Color on Route Markers Aids the Motorist — Mar.–68
Special Sign Treatments for Problem Locations — May–121
White Concrete Slabs for Traffic Lanes — May–134
Lighting and Traffic Control for Present Day Highways — June–91
Highlights of the Ohio Department of Highways Report — June–101
Traffic Control in a Colonial City — June–128
One-Way Street System Experiences — July–92
New Type Traffic Separating Bars — Aug.–89
The City Traffic Muddle–What Exit? — Aug.–107
Lighting and Traffic Control in Rhode Island — Aug.–108
Three-Phase Actuated Signals Handle High Traffic Volume — Sept.–113
The Yield Sign: Will It Reduce the Stop Sign Nuisance? — Oct.–91
Signs, Striping and Traffic Control in Arizona — Oct.–115
The World's Finest Master Traffic Control System — Nov.–77
Truck Climbing Lanes Speed Uphill Traffic — Dec.–60
Turnpike Traffic Control — Dec.–74

Weed and Brush Control

Cutting the Cost of Cutting Weeds — Feb.–68
How Roadside Clean-up is Handled by Counties — Feb.–117
Chemical Weed and Brush Control by Contract — June–67
Chemical Weed Control on County Highways — July–96
Chemical Weed Killers Improve Ditch Maintenance — Aug.–95
Chemicals Reduce Cost of Highway Roadside Maintenance — Sept.–105

Parking

Tax-Free Municipal Parking Program–It Works — Feb.–77
Let's Control Curb Parking Space — July–81
The City Traffic Muddle–What Exit? — Aug.–107
Details of Building for Parking and Commercial Use — Sept.–163
Economy in Parking Lot Striping — Dec.–65

REFUSE COLLECTION AND DISPOSAL

Collection Methods

Refuse Collection and Disposal for the Small Community — Feb.–89
Modern Refuse Collection Pays Off — May–105
Costs and Practices in Garbage Collection — May–144
Complaints Reduced 95% by Municipal Refuse Collection — June–84
There's No Substitute for Good Maintenance — Oct.–93
What Do I Do With Tin Cans, Bottles, Ashes and Rubbish? — Nov.–91
Study Provides the Answer to a County's Refuse Problem — Nov.–106
Organization for Refuse Disposal in San Antonio — Dec.–89

Month and page

Costs

Costs of Garbage, Rubbish and Ash Collection — Jan.–107
Sanitary Landfill Costs 63.4¢ per Ton of Refuse — Mar.–106
Costs and Practices in Garbage Collection — May–144
Costs of and Equipment for Cooking Garbage — Aug.–110
Street Cleaning and Refuse Costs — Sept.–150
Refuse and Ash Collection Costs and Volumes — Nov.–62

Incineration

Municipal Waste Collection and Disposal — Sept.–100
Methods of Handling Tree Trimmings — Sept.–164
Home Incinerators Help Solve Refuse Problem — Oct.–126
Incinerator Modernization Provides Control of Smoke, Odor and Fly Ash — Nov.–92
Sanitary Engineering Research and Progress in Maryland — Dec.–80
Modern Design Features New Incinerator — Dec.–87

Sanitary Fill

A Sanitary Landfill Solved Our Refuse Problem — Jan.–57
Refuse Collection and Disposal for the Small Community — Feb.–89
Sanitary Landfill Costs 63.4¢ per Ton of Refuse — Mar.–106
Sanitary Fill Handles 62,258 Weekly Refuse Pickups — Sept.–83
Texas Demonstrations Show Proper Landfill Operating Procedures — Sept.–84
Industrial Sites Created by Sanitary Fills — Sept.–86
New Sanitary Landfill for Maricopa County — Oct.–88
Organization for Refuse Disposal in San Antonio — Dec.–89
Sanitary Fill Experiences in Ohio — Dec.–124

Other Disposal Methods

Land Area Requirements for Composting Refuse — Jan.–107
Refuse Collection and Disposal for the Small Community — Feb.–89
Increased Use of Garbage Cooking — Feb.–118
Garbage Grinders and Sewage Treatment — Apr.–110
Treatment Plant Takes Ground Garbage in Stride — May–110
Refuse Composting Developments in New Zealand — July–77

Digests

Jan.–126; Feb.–112; Mar.–120; Apr.–134; May–174; June–138; July–121; Aug.–120; Sept.–159; Oct.–138; Nov.–112; Dec.–120

SEWERAGE AND SEWAGE TREATMENT

Finance, Legal and Planning

Economics of Sacramento's Sewage Treatment Plant — Jan.–51
Putting the Microscope on the Missouri Drainage Basin — July–110
Public Works Financing: How to Show the Benefits of Storm Sewers and Responsibilities for Them — Aug.–79
Cost of Handling Sludge from Lagoons and Beds — Aug.–110
Cost Data on Sewage Treatment Plant Construction, Operation and Maintenance — Sept.–66
How to Get Better Bids for Constructing Sewers — Sept.–138
Cincinnati's Little Miami Plant: First Step in Long Range Treatment Plan — Oct.–67
Forming a Sanitary District–Voters Prefer Water to Sewage — Oct.–100
Solving Subdivision Water and Sewerage Problems — Nov.–78
Controlling Water Supplies and Sewage Disposal in Subdivision — Dec.–98

Month and page

Sewer Systems — Construction

Steel Force Main Provides Sewerage for Residential Area — Jan.–79
Sewer Tunnel Speeded by Using Mining Equipment — Feb.–64
Digging a Tunnel for 30-Ft. Deep Sewer — Feb.–98
40-Foot Cut For a Sewer Line — Mar.–79
Plans for Miami's Sewage Disposal Project — Mar.–87
Sewage Treatment and Sewer Extensions–A Sign of Progress — June–70
Building a Concrete Block Sewer — July–84
Safer Trenching by Using a Trench Box — July–95
How to Build Better Sewers — Sept.–96
Cutting Reinforced Concrete Pipe with Explosives — Oct.–114

Sewer Systems — Design

Plans for Miami's Sewage Disposal Project — Mar.–87
Sewer System and Treatment Plant is High in the Rockies — July–72
How to Build Better Sewers — Sept.–96

Sewer Systems —Maintenance

Organization for Water and Sewer Maintenance — Apr.–86
How Los Angeles Handles Sewer Maintenance — May–119
Why Sewer Stoppages Have Decreased — May–139
How Manholes Are Checked for Toxic Gases — May–149
Planning Sewage Pumping and Sewer Maintenance to Keep Pace with Suburban Growth — July–91
Power Digger Saves Money for City — Aug.–75
Equipment for Sewer Maintenance — Aug.–86
How Walkie-Talkies Help in Sewer and Storm Drain Maintenance — Dec.–59
Should We Write Finis to Our Failed Sewers? — Dec.–69

Sewer Systems — Storm Drainage

Sewer Tunnel Speeded by Using Mining Equipment — Feb.–64
Design for Catch Basins and Inlets for Storm Sewers — May–106
Sewage Treatment and Sewer Extensions–A Sign of Progress — June–70
Public Works Financing: How to Show the Benefits of Storm Sewers and Responsibilities for Them — Aug.–79
A Complicated Pipe Laying Job for Flood Control — Sept.–114
How Walkie-Talkies Help in Sewer and Storm Drain Maintenance — Dec.–59

Sewage Pumping

Plans for Miami's Sewage Disposal Project — Mar.–87
Planning Sewage Pumping and Sewer Maintenance to Keep Pace with Suburban Growth — July–91

Sewage Treatment — Design

Economics of Sacramento's Sewage Treatment Plant — Jan.–51
Mercury Vapor Lighting for a Sewage Plant — Feb.–111
Difficult Terrain Complicates Sewage Treatment Plant Design — Mar.–70
Biofiltration Serves a Growing City — Apr.–73
Treatment Plant Takes Ground Garbage in Stride — May–110
Sewage Treatment and Sewer Extensions–A Sign of Progress — June–70
Sewer System and Treatment Plant is High in the Rockies — July–72
Cincinnati's Little Miami Plant: First Step in Long Range Treatment Plan — Oct.–67
Public Health Factors in Sewage Treatment Plant Design, Construction and Operation — Oct.–76
Design and Performance of an Award Winning Sewage Treatment Plant — Dec.–66
Theory of Compact Waste Treatment Plant Design — Dec.–73

Sewage Treatment — Industrial Wastes

Underground Water Pollution by Oilfield Brines — Apr.–93
Treating Industrial Wastes — May–170
Automatic pH Control Replaces Manual Operation for Acid Waste Treatment — July–67
English Research on Sewage and Industrial Waste Treatment — Aug.–102
Citrus Waste Treatment — Dec.–108

Month and page

Sewage Treatment — Operation

Report on the Forthcoming 10th Edition of "Standard Methods" — Jan.–90
Garbage Grinders and Sewage Treatment — Apr.–110
Good Operating Results Shown by Cranston Treatment Plant — Apr.–133
Fly Control at a Sewage Treatment Plant — June–87
Getting Water and Sewerage Facilities Ready for Winter — Aug.–70
Public Health Factors in Sewage Treatment Plant Design, Construction and Operation — Oct.–76
Design and Performance of an Award Winning Sewage Treatment Plant — Dec.–66

Sewage Treatment — Construction

Westchester County Builds New Sewage Works — Feb.–79
Problems in Constructing a Sewage Treatment Plant — July–107
Public Health Factors in Sewage Treatment Plant Design, Construction and Operation — Oct.–76
Where Sluice Gates Are Used in a Modern Sewage Treatment Plant — Nov.–119

Treatment Methods and Research

How Waste Water Reclamation Affects Ground Water Pollution — Jan.–59
Subsoil Sewage Disposal System for Septic Tank Effluents — Feb.–72
Waste Treatment Maintains Aerobic Conditions — Feb.–85
How to Get Good Trickling Filter Media — Feb.–99
Investigations of Temperature Effects on Sludge Digestion — Mar.–38
Evaluating the Use of Sewage Lagoons — Mar.–89
How to Get the Most from Your Sludge Drying Beds — Mar.–126
Rational Design for Ground Absorption — Apr.–79
Enzymes Give Good Results in Sewage Treatment Plant — Apr.–116
Sanitary Engineering Research — May–154
Vertical Separators Aid in Experimental Trickling Filter — June–75
Readers Discuss the Case for Sewage Lagoons — June–153
English Research on Sewage and Industrial Waste Treatment — Aug.–102
Algal-Bacterial Symbiosis May Produce Food for All — Oct.–108
Types of Detergents and Builders Contributing to Waste Treatment Problems — Dec.–85

Digests

Jan.–126; Feb.–112; Mar.–120; Apr.–134; May–174; June–138; July–121; Aug.–120; Sept.–159; Oct.–138; Nov.–112; Dec.–129

WATER SUPPLY AND PURIFICATION

Finance, Legal and Planning

Solving Wisconsin's Water Problems — Jan.–81
What Fluoridation Costs — Jan.–108
Meter Overhaul Program Increased Our Revenue by Fourteen Percent — Mar.–67
Cost of Laying Cast Iron Water Pipe in Maine — June–126
Cost of Laying Water Mains in Toledo — June–126
Controlling the Use of Air Conditioning Water — June–136
The System That Cured Our Record Keeping Headaches — Aug.–77
Cost of Laying Water Pipe in Elmira, N. Y. — Aug.–110
Public Relations: How to Dedicate a Water Tank — Oct.–85
Forming a Sanitary District—Voters Prefer Water to Sewage — Oct.–100
Costs of Laying Water Pipe in Hartford, Conn. — Nov.–62
Solving Subdivision Water and Sewerage Problems — Nov.–78
Wise Planning Cuts Costs of Water Works Addition — Dec.–71
Controlling Water Supplies and Sewage Disposal in Subdivisions — Dec.–98

Pumping

Solving Wisconsin's Water Problems — Jan.–81
Standby Power for Operation of Auxiliary Water Works Equipment — May–113
Flood Waters Pumped to Reinforce Reservoir Supplies — Aug.–93
Camouflaged Pump Stations for Residential Areas — Oct.–71
Automatic Controls Improve Water Supply Service — Nov.–87

Reservoirs and Tanks

Airdrome is Water Supply Reservoir — Mar.–85
Getting Fresh Water for St. Augustine — July–79
Flood Waters Pumped to Reinforce Reservoir Supplies — Aug.–93
Modern Design Features New Vallejo Water Project — Sept.–87
Public Relations: How to Dedicate a Water Tank — Oct.–85
Controlling Water Milfoil in a Texas Reservoir — Oct.–89
Clearing a Heavily Wooded Reservoir Site — Oct.–137

Supply Lines and Distribution — Construction

How Water Departments Use Labor Saving Equipment — Jan.–82
New Type Water Intake Proves Success — Feb.–81
Trenching Crew Makes Four or Five Main Extensions Daily — May–167
"Pie Pan" Applies Lubricant to Ring-Tite Joints — June–148
Making Meter Box Tile in Fiber Forms — Aug.–90

Supply Lines and Distribution — Design

How a Water Supply was Designed for a Permafrost Area — Jan.–64
Water System for Small Town has 103 Taps — Mar.–83
Modern Design Features New Vallejo Water Project — Sept.–87

Supply Lines and Distribution — Maintenance

How Water Departments Use Labor Saving Equipment — Jan.–82
Organization for Water and Sewer Maintenance — Apr.–86
Electronic Witch Takes Guesswork Out of Pipe Finding — Apr.–95
Records and Maps of the Water Distribution System — Apr.–106
Equipment Makes Better Water Department Operation — May–124
Freezing Cast Iron Water Mains to Make Repairs — May–138
Power Digger Saves Money for City — Aug.–75
Getting Hydrants Ready for Winter — Aug.–78
Planned Meter Maintenance Cuts Stoppages — Sept.–103
For Large Size Water Meters—An Electronic Tester — Dec.–79

Treatment Plants — Design and Operation

Solving Wisconsin's Water Problems — Jan.–81
For a Venturi—Life Begins at 40 — Apr.–88
Plant of Unusual Design Treats Surface Water for Houston — May–87
Public Health Factors in Water Plant Design, Construction and Operation — May–93
Modern Water Supply and Treatment for a Small City — June–78
Water Filter Plant Features Automatic Operation — July–80
Getting Water and Sewerage Facilities Ready for Winter — Aug.–70
Modern Design Features New Vallejo Water Project — Sept.–87
Automatic pH Control Saves Chemicals — Nov.–96
By-Pass Line Supplies Needed Extra Water — Dec.–88

Treatment Methods & Research

How Waste Water Reclamation Affects Ground Water Pollution — Jan.–59
Water Softening for Municipalities and Industries — Mar.–75
Research by Chicago Bureau of Water — May–148
Sanitary Engineering Research — May–154
Production and Use of Ozone in Water Treatment — June–86
Municipal Water Supply Softened by Continuous Base Exchange — Nov.–70
Sanitary Engineering Research and Progress in Maryland — Dec.–80
Making Brackish Water Potable — Dec.–125

Water Demand

Water Needs in a Fast Growing City — June–89

Water Testing

Report on the Forthcoming 10th Edition of "Standard Methods" — Jan.–90
Water Analyses Aid in Selection of Plumbing Materials — Feb.–66
Water Pollution Research in England — July–103
Water Analysis is Big Business — Dec.–62

Water Supply and Sources

How Waste Water Reclamation Affects Ground Water Pollution — Jan.–59
How to Trace Ground Water Flow — Feb.–75
New Type Water Intake Proves Success — Feb.–81
Providing Safe Water in Emergencies — Apr.–70
11 Texas Cities Join in Giant Pipeline and Dam Project — Apr.–75
Modern Water Supply and Treatment for a Small City — June–78
Getting Fresh Water for St. Augustine — July–79
San Francisco Plans for Water Supply in the Year 2000 — July–89
More Water—Southern City Puts End to Drought Hazards — Sept.–111
Getting Water for Philadelphia — Nov.–81

Digests

Jan.–112; Feb.–96; Mar.–136; Apr.–118; May–182; June–148; July–114; Aug.–112; Sept.–166; Oct.–120; Nov.–128; Dec.–104

ADMINISTRATION

How Public Relations Help Citizens to "Know Brookfield" — Jan.–54
The Impact of a Housing Boom on City Facilities — Feb.–74
No Man's Land — Mar.–73
Controlling Regional Development — Mar.–134
Two-Way Radio Saves Time and Money for Maintenance Officials — Apr.–89
How the City Engineer Can Improve His City — May–128
Recommended Practice for Competitive Bidding and Letting — May–180
Highlights of the Ohio Department of Highways Report — June–101
Photogrammetry in City Planning — June–114
Mr. Public Official: What Can You Do About Safety — July–134
The System That Cured Our Record Keeping Headaches — Aug.–77
Air Mapping Completed for Kent County, Mich. — Aug.–98
Municipal Garage and Repair Shop for Birmingham — May–67
Work Safety Programs — Nov.–102

AIRPORTS

Airdrome is Water Supply Reservoir — Mar.–85
Airport Runway Extension Makes a Modern Field — Apr.–77

CIVIL DEFENSE

Civil Defense and Natural Disasters: Transportation in Disasters and Emergencies — Apr.–67
Providing Safe Water in Emergencies — Apr.–70
Insect and Rodent Control in Local Disaster Planning — Apr.–72
Mobile Communication Unit Is Mounted in Trailer — July–103
A New Look at Civil Defense in St. Louis — Sept.–107
Sewerage and Water Problems of the Rio Grande Flood — Sept.–145

MUNICIPAL POWER PLANTS

Dual-Fuel Conversion Saves Anadarko 50 Percent — Jan.–102
Dual-Fuel Engine Cuts Costs by 55.5% — Mar.–84
Municipal Power Plant Saves $11,700 in Year — Apr.–92
Standby Power for Operation of Auxiliary Water Works Equipment — May–113
Meeting a Municipal Power Problem — June–77
Power Plant is a Civic Showplace — Sept.–110
Plant Fuel Costs Drop 35 Percent Since Installing New Engine. — Dec.–72

INSECT AND RODENT CONTROL

Month and page

Observation on the Resting Habits of Flies Jan.–130
Insect and Rodent Control in Local Disaster Planning Apr.–72
Fly Control at a Sewage Treatment Plant June–87

PUBLIC HEALTH

A-B-C of Radiation Hazards Apr.–69
Public Health Service Dedicates Sanitary Engineering Research Center Apr.–139
Public Health Factors in Water Plant Design, Construction and Operation May–93
Waterborne Disease Outbreaks Reported by the PHS Aug.–132
Sewerage and Water Problems of the Rio Grande Flood Sept.–145
Public Health Factors in Sewage Treatment Plant Design, Construction and Operation Oct.–76

RECREATIONAL FACILITIES

Silt Removal from a City Lake Feb.–82
City Engineers Design a Football Field June–82
How It Was Done: The Development of a Small Municipal Park July–85
Playground Equipment: Selection, Installation and Maintenance Sept.–122
Design Data for Open Air Artificial Ice Rinks Oct.–98
"Parky" is a New Symbol of Cleanliness for Public Grounds Nov.–100
Low-Cost Stadium Resurfacing Nov.–143

GENERAL AND MISCELLANEOUS

Tax Exempt Property in Milwaukee Jan.–98
Stretching Public Works Dollars with Compressed Air Feb.–71
Part Speed Efficiencies of Wound Rotor Motors Mar.–96
Public Employees: Overlooked Quotients in Safety Mar.–141
Saving $150,000 a Year by Selling Waste Trees May–92
Keeping Ferry Channels Free of Ice June–126
Air Placed Concrete Used in Baltimore Harbor Face Lifting Nov.–136

LEADERS IN PUBLIC WORKS

William H. Weir Jan.–1, 22
Kenneth K. King Feb.–1, 28
John McDonald Mar.–1, 30
Robert L. Lippman Apr.–1, 24
D. R. Taylor May–1, 22
Frederick W. Crane June–1, 22
T. H. Sauter July–1, 26
C. W. Hamblin Aug.–1, 18
Claude R. McMillan Sept.–1, 78
Harold B. Gotaas Oct.–1, 26
Joseph J. Gilbert Nov.–1, 20
Edward J. Clark Dec.–1, 26
